MSCM - Maritime and Supply Chain Management

MARITIME AND SUPPLY CHAIN MANAGEMENT Courses

MSCM 368. Maritime and Supply Chain Internship. 1-3 Credits. Approval for enrollment and allowable credit is determined by the Business Analytics CAP advisor and the Career Development Services in the semester prior to enrollment. Prerequisites: Must have a declared major in the University or permission of the Dean's Office.

MSCM 370. International Shipping. 3 Credits. The course examines international freight transportation and terms for movement of international trade. It discusses processes and concepts involved in international ocean and intermodal transportation. It shows how shipping companies enter into foreign markets and participate in international trade. It also covers operational issues such as payment, commercial documents, insurance; customs and clearance; shipping organizations and societies, and shipping law. Prerequisite: junior standing or permission of the instructor.

MSCM 415. Maritime Security and Risk Analysis. 3 Credits. An overview of international and U.S. initiatives to ensure the security of vessels, cargo, people, and infrastructure within the maritime domain. In addition to the impacts of regulatory requirements on maritime commerce, the course also addresses maritime threats to the international economy (including maritime piracy and maritime terrorism), maritime coalitions, and state-of-the-art techniques and tools for safeguarding ocean-borne commerce. Prerequisite: MSCM 370.

MSCM 430/530. Strategic Sourcing and Purchasing Management. 3 Credits. An overview of the strategic sourcing of materials and services in the organization and its role in the supply chain. Topics include sourcing decisions, price/cost analysis, quality issues, purchasing, supplier selection, legal and ethical issues, third party logistics, freight forwarding, and acquisition of services and capital assets. Prerequisites: ACCT 202, BNAL 206, OPMT 303, and a declared major in the University or permission of the Dean's Office.

MSCM 439. Quality Management. 3 Credits. This course examines the application of quality principles to the management of manufacturing and service organizations. Topics include fundamentals of quality management, Six Sigma, statistical process control, process capability and reliability. Prerequisites: OPMT 303 and a declared major in the University or permission of the Strome College of Business Dean's Office.

MSCM 441. Supply Chain Management and Logistics. 3 Credits. Supply chain management integrates all activities associated with the flow of materials and information from product start to customers. Examples include order processing, warehousing, inventory management, transportation and logistics, and the costs and information systems supporting these activities. This course is designed to explore and analyze the current condition of inland waterways both throughout the United States and around the globe with an emphasis on the creation of intermodal transportation networks. It will include an overview of existing infrastructure and the environmental benefits as well as consider current legislation. Prerequisite: MSCM 370.

MSCM 445. Marine Insurance. 3 Credits. An introduction to the fundamentals of cargo, hull, protection and indemnity insurance. Topics include insurance markets, agents, underwriters, forms of policies, valuation, Total Loss, Particular Average, General Average, insured perils, war risks, subrogation, reinsurance and insurers of pollution liabilities. Prerequisites: MSCM 370.

MSCM 468/568. Distribution Center and Material Handling Management. 3 Credits. This course is designed to investigate the strategic role of distribution center and material management in the supply chain. Course content includes the analysis of distribution center operations through the study of design, system selection, and layout configuration as well as the evaluation of material handling and inventory management options. Prerequisites: OPMT 303.

MSCM 471. Shipping Management. 3 Credits. Examines the management of freight shipping organizations involved in the transport of cargo by ship. Key topics are managing ships and ship space; shipping markets, operations, costs, investment, insurance, claims, and regulation; and ship types, cargoes, safety, flagging, pollution, and chartering and purchase. Prerequisites: For MSCM majors, the prerequisite is MSCM 370; for other business majors, the prerequisites are ECON 201S and ECON 202S; for nonbusiness majors, the prerequisites are ECON 201S and ECON 202S or permission of the instructor; all students must have a declared major or permission of the College of Business dean's office.

MSCM 472. Port Management. 3 Credits. Examines the management of seaports in the movement of cargo throughput. It presents concepts related to design, organization, administration, and operation of ports. It discusses issues involved in planning, investment, communication systems, congestion, pollution, safety, security; intermodal transportation; water and land accessibility; and port competition and cooperation to improve customer service. Prerequisites: For MSCM majors, the prerequisite is MSCM 370; for other business majors, the prerequisites are ECON 201S and ECON 202S; for nonbusiness majors, the prerequisites are ECON 201S and ECON 202S or permission of the instructor; all students must have a declared major or permission of the College of Business dean's office.

MSCM 473. Inland Waterway and Intermodal Transportation. 3 Credits. This course is designed to explore and analyze the current condition of inland waterways throughout the United States, and around the globe with an emphasis on the creation of intermodal transportation networks. It will include an overview of existing infrastructure and the environmental benefits as well as consider current legislation. Prerequisite: MSCM 370.

MSCM 495/595. Topics in Maritime and Supply Chain Management. 3 Credits. A study of selected topics within Maritime and Supply Chain Management designed to provide an in-depth exploration of current issues. Prerequisites: permission of the instructor, and a declared major in the University or permission of the College of Business Dean's Office.

MSCM 497. Independent Study. 3 Credits. Affords students the opportunity to undertake independent study under the direction of a faculty member. Prerequisites: permission of the department, and a declared major in the University or permission of the College of Business Dean's Office.

MSCM 530. Strategic Sourcing and Purchasing Management. 3 Credits. An overview of the strategic sourcing of materials and services in the organization and its role in the supply chain. Topics include sourcing decisions, price/cost analysis, quality issues, purchasing, supplier selection, legal and ethical issues, third party logistics, freight forwarding, and acquisition of services and capital assets.

MSCM 568. Distribution Center and Material Handling Management. 3 Credits. This course is designed to investigate the strategic role of distribution center and material management in the supply chain. Course content includes the analysis of distribution center operations through the study of design, system selection, and layout configuration as well as the evaluation of material handling and inventory management options. Prerequisites: OPMT 303.
MSCM 595. Topics in Maritime and Supply Chain Management. 3 Credits.
A study of selected topics within maritime and supply chain management
designed to provide an in-depth exploration of current issues. Prerequisite:
Permission of the instructor.

MSCM 610. International Shipping and Supply Chain Management. 3 Credits.
Lecture 3 hours; 3 credits. Examines international freight transportation and
terms for movement of international trade; focuses on improving supply
chain relationships in the movement of international trade/directing the flow
of information, materials and products. (cross-listed with PORT 610).

MSCM 615. Maritime Security and Risk Analysis. 3 Credits.
An overview of international and U.S initiatives to ensure the security of
vessels, cargo, people, and infrastructure within the maritime domain. In
addition to the impacts of regulatory requirements on maritime commerce,
the course also addresses maritime threats to the international economy
(including maritime piracy and maritime terrorism), maritime coalitions,
and state-of-the-art techniques and tools for safeguarding oceanborne
commerce. (cross-listed with PORT 615).

MSCM 616. Reverse Logistics and Sustainable Operations. 3 Credits.
This course explores the theoretical foundations of global supply chain
partnerships and reverse logistics systems, and examines the practices,
risks, and opportunities found in today's systems. Fundamental tools
and techniques are used to provide insights and solutions on how to best
organize, manage, and optimize such systems to achieve sustainable
performance. (cross-listed with PORT 616).

MSCM 617. Transportation Intermediaries. 3 Credits.
An overview of the document, role and functions of transportation
intermediaries. The relationships between intermediaries, carriers and
shippers are discussed as well as the major intermediaries and their
competitive strategies. The customers of various international trade and
supply chains of intermediaries are also discussed. (cross-listed with
PORT 617).

MSCM 641. Supply Chain Management and Logistics. 3 Credits.
Supply chain management integrates all activities associated with the flows
of materials, information, and funds. Examples include strategic sourcing,
order processing, warehousing, inventory management, transportation and
logistics, and the costs and information systems supporting these activities.

MSCM 890. Seminar in Business Process and Enterprise Systems. 3 Credits.
This course discusses how firms achieve business excellence through
business process management (BPM), business process improvement (BPI),
and business process reengineering (BPR) supported by IT. Topics include
business process and workflow modeling, analysis, integration, monitoring
and management. Prerequisites: IT 800 or DSCI 800.

MSCM 893. Seminar in Supply Chain in E-Business. 3 Credits.
This course examines the development of information technologies related
to supply chain management in a global e-business environment. Topics
include managing material flow processes, maritime, logistics, procurement,
inventory and distribution. (cross-listed with IT 893) Prerequisites: IT 800.
