Department of Economics

2044 Constant Hall
(757) 683-3567

Larry "Chip" Filer, Chair

Master of Arts—Economics
Larry "Chip" Filer, Graduate Program Director

Economics is "the social science concerned with how individuals, institutions, and society make optimal choices under conditions of scarcity." This is a broad field, covering everything from unemployment and inflation to stock market crashes and depressions, from perfect competition among firms to oligopoly and monopoly. Microeconomics studies firms, consumers, goods markets, resource markets, labor markets, and the price system. It gives recommendations about how to deal with pollution and auctions of the electromagnetic spectrum. Macroeconomics studies unemployment, inflation, money supplies, interest rates, exchange rates, national debt, and economic growth. Economics is concerned with the problems of incentives, wealth, poverty, and income distribution. Subfields include microeconomics, macroeconomics, econometrics, labor economics, public economics, regional economics, environmental economics, development economics, economic history, health economics, sports economics, financial economics, the economics of education, the economics of crime, comparative economics, international economics, transportation economics, urban economics, industrial organization, and money and banking.

Economics is very important for the formulation of public policy, business strategies, and financial strategies. Economics is very quantitative. In the Master of Arts in Economics program, students will develop strong mathematical and statistical skills, as well as learn about how the economy works. Economists do economic analysis, make economic and econometric models of the economy, formulate economic policy, make business strategies, forecast economic variables, and do benefit-cost analysis.

Economics provides a good background for jobs in business, banking, finance, marketing, law, government, politics, military, diplomacy, and journalism. Our graduates typically find economics positions in banks and firms, go to work in government, teach economics at community colleges, or enter MBA or Ph.D. programs in Economics and Finance.

The Old Dominion University Department of Economics is especially strong in regional economics, international economics, and econometrics. The department is the home of the Hampton Roads Regional Economic Forecasting Project and the State of the Region Report. Our MA students are often involved in these projects.

If taken full time, the MA in Economics program can be easily completed within 21 months. At a faster pace, the program can be completed in as little as 16 months. Alternatively, the program can be completed attending part-time, but more time will be required.

If one was not an undergraduate economics major, certain prerequisites must be completed before starting the advanced courses. One must have had courses in calculus, statistics, intermediate microeconomics, and intermediate macroeconomics. These courses may be completed here at Old Dominion prior to taking the MA program core courses.

The Master’s degree (MA) program in Economics is more intensive than the Bachelor’s degree (BA/BS) in Economics. The MA courses study economics at a deeper level than in the undergraduate courses, and are more mathematical. Graduate students must maintain a grade point average of 3.0 or better. All students in the program are trained in economic theory and research methods, and take several courses emphasizing business or government policy analysis in various specialty areas. An independent research project is required, permitting students an opportunity to apply theory and empirical research techniques to real-world problems.

The Department of Economics encourages interdisciplinary training. The Master’s program can be adapted for students desiring a diverse background by combining economics with graduate courses in sociology, political science, computer science, statistics, mathematics, finance, management, marketing research, or public administration.

Admission

In addition to the University’s graduate admission requirements, applicants seeking regular admission must have at least a 3.0 grade point average in their major. Applicants are required to take either the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT), and they must submit at least one letter of recommendation. If the undergraduate grade point average falls below that required for regular status, applicants may qualify for provisional admission.

Requirements

Undergraduate prerequisites include principles of economics, calculus (three credit hours), statistics (six credit hours), intermediate microeconomics, and intermediate macroeconomics with grades of at least B-. Students who do not yet meet the undergraduate prerequisites can complete those courses at Old Dominion University before taking the advanced courses.

Thirty semester credit hours (ten courses) of approved graduate work are required for the award of the Master of Arts degree in economics. A maximum of six credit hours of 500-level courses approved for graduate credit may be applied toward the degree. The remaining courses must be taken from 600- and/or 700-level courses. Up to six credit hours (two courses) of electives (approved by the graduate program director) may be taken from courses outside the Department of Economics. Required core economics courses for the graduate program are:

Total Hours: 12

All master’s candidates must pass written comprehensive examinations in Microeconomics, Macroeconomics, Econometrics I, and one elective course area selected by the student.

Writing skills commensurate with the level of this degree are also a requirement for graduation from this program.

Near the completion of formal course work, candidates conduct independent research projects with the non-thesis or thesis option. Students who choose the non-thesis option register for ECON 697 and ECON 698 in the last semesters of course work. Non-thesis students conduct independent research projects under the guidance of a department faculty member. Students must first register for ECON 697, a reading course under the supervision of a faculty member, for three credits, and then register for ECON 698, the research project writing course, also under the supervision of a faculty member, for three credits. Students who choose the thesis option should register for ECON 699 in the final semester. Six hours of credit are given for this course. The thesis is guided and approved by the committee of at least three members of the department. Detailed instructions, requirements, and deadlines are contained in the guide for Preparation of Theses and Dissertations, available from The Graduate School's web site, http://www.odu.edu/graduateschool.

poverty, housing conditions, traffic congestion, and the fiscal crisis faced by
An analysis of the economic factors which give rise to the formation of
ECON 545
of economic theory in the study of the growth and development of the
times to the present. An analytical course concerned with the application
ECON 544
quality, and the aging of the population.
will survey the delivery of health care in other countries and provide a
government involvement in the delivery of health care. Further, the course
the market for health care, the political economy of health care, and
surrounding those problems, and the potential solutions to those problems.
The course will emphasize institutional features of the health care industry,
functioning of markets and the problems of market and government failure.
The course addresses the question, what is the best way to organize society?.
ECON 556. Economics of Information, the Internet and E-Commerce. 3 Credits.
Outlines the economic principles of information that underpin the Internet
and e-commerce. Considers auctions, economies of scale and scope, data
mining, price discrimination, product bundling, versioning, networking, the
diffusion of innovations and intellectual property as they are utilized on the
Internet and in e-commerce. Taught in a microcomputer laboratory.
ECON 595. Selected Topics in Economics. 1-3 Credits.
Taught on an occasional basis. A study of selected topics, the title of
which will appear in the course schedule. Prerequisites: Permission of the
instructor.
ECON 604. Managerial Economics and International Trade. 3 Credits.
Demand and supply, theory of optimizing behavior, demand elasticity,
demand forecasting, production, costs, pricing with market power, multiple
plants, markets and products, profit maximization, uncertainty, international
trade and tariffs. (Credit may not be applied toward the M.A. in Economics.)
Pre- or corequisite: BNAL 600 or URBN 606.
ECON 607. Managerial Economics. 2 Credits.
This course introduces the MBA student to the use of economic analysis to
aid managerial decision-making. Topics include demand and supply, theory
of optimizing behavior, demand elasticity, production, cost analysis and
pricing with and without market power. Other topics include an introduction
to game theory, alternative pricing techniques and the internal organization
of firms. Prerequisites: Admission to the MBA Program, MBA 601,
MBA 601, MBA 602, MBA 603, and MBA 604.
ECON 612. Global and Applied Macroeconomics. 3 Credits.
Measurements and indicators of economic activity; short-run
macroeconomic analysis, credit markets, demand for money, institutional
factors in money and banking, money creation, and monetary policy, long-
run macroeconomics, short-run macroeconomic comparative statics, foreign
exchange markets; description and history of business cycles, inflation,
economic growth and public policies. (Credit may not be applied toward the
M.A. in economics.) Prerequisites: ECON 604.
ECON 618. Global Macroeconomics. 2 Credits.
This course examines the measurement of macroeconomic variables
and their movements over time. Short-run and long-run models of the
macroeconomy are covered along with institutional factors of financial
markets. The course mixes theory with real world applicability. Students will
examine critical economic policy issues of the day. Prerequisites: Admission
to the MBA Program, MBA 600, MBA 601, MBA 602, MBA 603, and
MBA 604.
ECON 625. Mathematical Economics. 3 Credits.
This course focuses on the use of mathematical techniques in solving complex economic problems. Primary emphasis is given to matrix algebra, differential calculus, constrained optimization techniques and dynamic optimization techniques. Prerequisites: ECON 604 or ECON 612 or ECON 650.

ECON 650. International Economics. 3 Credits.
An analysis of international trade theory, commercial policy, foreign exchange markets, open economy macroeconomics, and balance of payments. The course provides the theoretical basis to understand contemporary international economic issues. (Credit may not be applied toward the M.A. in economics.).

ECON 668. Economics Internship. 1-3 Credits.
The course is a practicum in the field of economics applying theories, concepts, and quantitative tools in a professional environment. Prerequisites: Twelve hours of economics and permission of the graduate program director.

ECON 695. Selected Topics in Economics. 1-3 Credits.
Advanced topics in economics specifically designed for school teachers. (Credit may not be applied toward the M.A. in economics or the MBA.) Prerequisites: Permission of the instructor.

ECON 696. Selected Topics in Economics. 1-3 Credits.
Advanced topics in economics are covered in this course.

ECON 697. Readings in Economics. 3 Credits.
Individual readings in a selected field under the direction of a faculty member of the department.

ECON 698. Economic Methodology and Research. 3 Credits.
Individual research under the direction of a faculty member of the department.

ECON 699. Thesis. 6 Credits.
Directed research for thesis.

ECON 701. Advanced Economic Analysis: Microeconomics. 3 Credits.
Concepts and techniques of modern microeconomic theory, development in the theory of utility and demand, theory of the firm and market, partial and general equilibrium analysis. Prerequisites: ECON 604 or equivalent. Pre- or corequisite: ECON 625.

ECON 703. Advanced Economic Analysis: Macroeconomics. 3 Credits.
Study of income, employment, the price level, money, and the effect of government policy under static and dynamic conditions. Mainstream and alternative theories considered. Prerequisites: ECON 612 or equivalent. Pre- or corequisite: ECON 625.

ECON 706. Econometrics I. 3 Credits.
Single-equation econometric models; serial correlation, heteroscedasticity, specification error, missing observations, and errors-in-variables and forecasting. Prerequisites: ECON 604 or equivalent and ECON 612 or equivalent. Pre- or corequisite: ECON 625.

ECON 707. Econometrics II. 3 Credits.
Multi-equation econometric models; problems such as identification, single-equation estimation, estimation of equation systems, and model evaluation techniques; time-series models such as autoregressive and moving average models; forecasting with time-series models. Prerequisites: ECON 706 or equivalent.

ECON 708. Econometrics III. 3 Credits.
Issues in cross-section and panel data, focuses on problems such as selection bias, heterogeneity, unobserved heterogeneity, treatment effects, truncation and censoring. The course covers multivariate techniques such as principal component analysis and factor analysis, along with event studies and nonparametric and semiparametric estimators. Prerequisites: ECON 707 or equivalent.

ECON 752. International Trade. 3 Credits.
Pure theory of international trade, mathematical models of trade, instruments of trade policy, theory and practice of economic integration, trade liberalization issues from international and regional viewpoints. Prerequisites: ECON 604 or ECON 650 or equivalent.

ECON 753. International Finance. 3 Credits.
International capital flows, exchange rates and price level, income, money supplies, inflation, international liquidity, causes of international balance and imbalance, balance-of-payments adjustments. Monetary magnitudes as a basis for insight into international financial policies. Prerequisites: ECON 612 or ECON 650 or equivalent.

ECON 754. Economic Development. 3 Credits.
Introduction to the problems of economic development in the third world, including the problems of economic growth, income distribution, poverty, urbanization, uneven development, agricultural policy, economic planning, industrial policy, trade policy, balance of payments, finance, and currency crises. Prerequisites: ECON 604 or ECON 650.

ECON 759. Selected Topics in Economics. 1-3 Credits.
Designed to provide the advanced student with an opportunity to study independently or in small groups and investigate specific topics of current interest in the field of economics. Prerequisites: Ph.D. standing and permission of the chair and coordinator.

ECON 801. Advanced Economic Analysis: Microeconomics. 3 Credits.
Concepts and techniques of modern microeconomic theory, development in the theory of utility and demand, theory of the firm and market, partial and general equilibrium analysis. Prerequisites: ECON 604 or equivalent. Pre- or corequisite: ECON 625 or equivalent.

ECON 803. Advanced Economic Analysis: Macroeconomics. 3 Credits.
Study of income, employment, the price level, money, and the effect of government policy under static and dynamic conditions. Mainstream and alternative theories considered. Prerequisites: ECON 612 or equivalent. Pre- or corequisite: ECON 625.

ECON 806. Econometrics I. 3 Credits.
Single-equation econometric models; serial correlation, heteroscedasticity, specification error, missing observations, and errors-in-variables and forecasting. Prerequisites: ECON 604 or equivalent and ECON 612 or equivalent. Pre- or corequisite: ECON 625.

ECON 807. Econometrics II. 3 Credits.
Multi-equation econometric models; problems such as identification, single-equation estimation, estimation of equation systems, and model evaluation techniques; time-series models such as autoregressive and moving average models; forecasting with time-series models. Prerequisites: ECON 806 or equivalent.

ECON 808. Econometrics III. 3 Credits.
Issues in cross-section and panel data, focuses on problems such as selection bias, heterogeneity, unobserved heterogeneity, treatment effects, truncation and censoring. The course covers multivariate techniques such as principal component analysis and factor analysis, along with event studies and nonparametric and semiparametric estimators. Prerequisites: ECON 807 or equivalent.

ECON 852. International Trade. 3 Credits.
Pure theory of international trade, mathematical models of trade, instruments of trade policy, theory and practice of economic integration, trade liberalization issues from international and regional viewpoints. Prerequisites: ECON 604 or ECON 650 or equivalent.

ECON 853. International Finance. 3 Credits.
International capital flows, exchange rates and price level, income, money supplies, inflation, international liquidity, causes of international balance and imbalance, balance-of-payments adjustments. Monetary magnitudes as a basis for insight into international financial policies. Prerequisites: ECON 612 or ECON 650 or equivalent.

ECON 854. Economic Development. 3 Credits.
Introduction to the problems of economic development in the third world, including the problems of economic growth, income distribution, poverty, urbanization, uneven development, agricultural policy, economic planning, industrial policy, trade policy, balance of payments, finance, and currency crises. Prerequisites: ECON 604 or ECON 650.
ECON 895. Selected Topics in Economics. 1-3 Credits.
Designed to provide the advanced student with an opportunity to study independently or in small groups and investigate specific topics of current interest in the field of economics. Prerequisites: Ph.D. standing and permission of the chair and coordinator.

ECON 998. Master’s Graduate Credit. 1 Credit.
This course is a pass/fail course for master’s students in their final semester. It may be taken to fulfill the registration requirement necessary for graduation. All master’s students are required to be registered for at least one graduate credit hour in the semester of their graduation.

ECON 999. Doctoral Graduate Credit. 1 Credit.
This course is a pass/fail course doctoral students may take to maintain active status after successfully passing the candidacy examination. All doctoral students are required to be registered for at least one graduate credit hour every semester until their graduation.
