HLTH 101 Introduction to the Health Professions (1 Credit Hour)
Explores careers in the health professions. Assists students in making
informed choices regarding careers and programs of study and prepares
students to apply for acceptance into health-related majors. Activities are
included to help freshmen transition to college work.

HLTH 102 Health Professions in the United States (1 Credit Hour)
This course examines the health care system in the U.S. and identifies the
role played by selected health professions in the delivery of care. Designed
for students preparing themselves for entry into health related majors.
Prerequisites: HLTH 101 or permission of instructor

HLTH 120G Information Literacy for Health Professions (3 Credit Hours)
This course focuses on building basic skills for conducting health research
and includes guidance on locating, utilizing, and evaluating sources. The
course examines the methods and tools of health analysis and explores
the mechanics of research presentation and writing to help health-related
majors prepare for successful completion of upper-division requirements.
The class provides a brief introduction to ethical issues related to health
research and writing. The class also covers basic computer skills such as
using spreadsheets and document management tools.

HLTH 130 Computer Technology Skills for the Health Professions (2 Credit Hours)
This course is designed to help students in the health professions gain the
computer and technological skills needed to succeed in their academic
careers and in today's workplace. Students will develop personal competency
in practical applications such as Google Docs, spreadsheets and presentation
graphics, note taking applications, document revisions, computer hardware,
information retrieval and ethics in health information.

HLTH 397 Independent Study (3 Credit Hours)

HLTH 425 Leadership and Management for Health Professionals (3 Credit Hours)
A review of the administration, management, policies, and practices
governed by scopes of practice in a variety of health care settings. Topics
covered include communication, planning and decision making, leadership
and conflict management, and legal and ethical issues of concern to specific
health professions.
Prerequisites: junior standing

HLTH 495/595 Topics in Health (1-3 Credit Hours)

HLTH 595 Topics in Health (1-3 Credit Hours)

HLTH 697 Independent Study (3 Credit Hours)
