Marcellina Wade, Advisor
To be named, Advisor

The mission of the College of Health Sciences is to provide leadership in healthcare by offering excellent educational experiences in a quality learning environment to facilitate the development of competent, caring health professionals, by generating knowledge through inquiry and discovery, and by engaging in lifelong learning, and professional and community service. The college vision is to be a nationally ranked and internationally recognized leader in advancing health care by educating competent health professionals, generating practically significant scientific knowledge and innovative technologies, fostering scholarly collaborations and promoting positive public health policies. The college values integrity, inclusiveness, excellence and partnership. The degree programs are competitive, fully accredited, and nationally recognized for quality graduates.

The college consists of the School of Community and Environmental Health, the Gene W. Hirsfield School of Dental Hygiene, the School of Medical Diagnostic and Translational Sciences, and the School of Rehabilitation Sciences. These schools offer a variety of baccalaureate, master’s, and doctoral degrees, undergraduate, graduate, and non-degree certificate programs, accelerated and degree completion programs, minors, and professional continuing education programs. In addition, many of these programs are offered off-campus and in a variety of online formats. See individual program information or the Graduate Catalog for details.

Program Application, Acceptance, and Continuation

Intended Health Sciences Students - Health Sciences Advising Center

Students who qualify for regular admission to the University and who intend to apply for admission to a health sciences major program are considered Intended Health Sciences students until admitted to their intended major. They will be assigned an advisor in the Health Sciences Advising Center while completing general education and prerequisite requirements needed to apply to their intended major. Intended health sciences students receive individualized advising support designed to prepare them for success in their chosen health sciences major.

HSAdvising@odu.edu

Regulations for Continuance as an Intended Health Sciences Major

Students are eligible to continue as Intended Health Sciences majors as long as they meet both of the following:

1. Meet the continuance regulations of the University.
2. Make reasonable progress toward matriculation into a College of Health Sciences major program.

At the end of each semester (fall, spring, and summer), the Health Sciences Advising Center reviews the records of all students who do not meet minimum admissions requirements for their intended major (see admissions information in the specific program sections of the Catalog and on the web site.) A student who has ceased reasonable progress toward admission into a Health Sciences degree program will be notified in writing via the student’s Old Dominion University e-mail address, in accordance with the Electronic Communication Policy for Official University Business.

Students identified as not making reasonable progress toward their intended Health Sciences degree program will be referred to an advisor in the Student Success Center and/or the Center for Major Exploration for assistance in selecting a new intended major.

Program Admission

A separate application must be submitted to be considered for acceptance into the health science majors. Application information, qualifications, deadlines, and advisors are listed in the specific program sections of the Catalog and on the web site.

Acceptance to the University does not constitute or guarantee acceptance into a health science major. Students are notified by the program director of their acceptance and any other program specific requirements such as physicals, immunizations, technical standards, etc.

Continuance in the health science majors requires strong academic achievement, including successful demonstration of knowledge and use of practical and critical thinking skills in laboratory and in clinical rotations. Criminal background checks may be required as specified in course syllabi. Any student deemed unacceptable for clinical rotation due to results from a criminal background check will not be allowed to complete the program of study.

Advanced Placement

Advanced placement credit may be earned for courses offered by the College of Health Sciences upon validation of mastery of the subject matter and skills covered in the respective course(s). A fee may be charged for the assessment of competency. Please check with the school offering the course for further information.

Bachelor of Science in Health Sciences Programs

- Health Sciences with a Major in Cytotechnology (BSHS) (http://catalog.odu.edu/undergraduate/health-sciences/programs/health-sciences-cytotechnology-bshs/)
EVMS – Physician Assistant, Early Assurance Program

ODU and Eastern Virginia Medical School have entered into an Early Assurance Program (EAP). ODU applicants meeting certain criteria are eligible for early assurance into the EVMS Master of Physician Assistant (MPA) program. To be eligible to apply through the EAP program, students must meet and maintain the following criteria.

I. INITIAL ELIGIBILITY

To be eligible for the Early Assurance Program (EAP), a student must:

1. Be at least in their Junior year at the University and with only one year left to complete in their undergraduate education. Interested students should meet with the University EAP Advisor during their freshman year to express interest in the EAP;
2. Meet citizenship requirements of the program;
3. Meet all University institutional and degree requirements to continue as a student in good standing;
4. Maintain an overall (cumulative) GPA of 3.25 or better, on a 4.0 scale;
5. Have satisfactorily completed seven of eight prerequisite courses at the University as indicated on the program’s EAP website by the time of application without withdrawing from or repeating any course(s) used to satisfy the prerequisites;
6. Be able to accumulate 500 hours of patient care experience before being accepted into the program;
7. Have no honor and/or academic code violations, as applicable, or other code of conduct violations; and
8. Have satisfactorily completed the online personal and professional characteristics assessment (Computer-based Assessment for Sampling Personal Characteristics).

II. MAINTAINING ELIGIBILITY

The guarantee of admission through the EAP is contingent upon the student’s continued eligibility in the EAP to include:

1. Carrying a sufficient credit load during the remaining regular academic semesters to fulfill University undergraduate degree requirements by the graduation date specified in the student’s application. Should a student be unable to complete their undergraduate degree in the original timeframe specified, the student would be dismissed from the EAP, but it would not affect eligibility to apply to the program at a later time;
2. Making significant progress towards achievement of the individually specified goals outlined on the Healthcare Experience Plan of Completion (HCE POC) submitted with the student’s application;
3. Maintaining contact each semester with the University EAP Advisor during the students’ senior year and the program after graduation;
4. Maintaining an overall (cumulative) GPA of 3.25 or better with consistent academic performance;
5. Making progress towards accumulation of additional hours to meet a goal of 1,000 hours of patient care experience before matriculating in the program as detailed in the HCE POC;
6. Completing any specific matriculation conditions set forth by the program (e.g., official transcripts confirming date of degree completion, a criminal background check prior to matriculation, indication of ability to meet the Technical Standards of the program, and submission of all health requirements; and
7. Remaining free of any actions or conduct that would cause the Admissions Committee to question a student’s suitability to pursue a career in medicine. These include, but are not limited to, misdemeanor or felony convictions, academic dishonesty or other code of conduct violations, and/or unprofessional conduct in a health care or educational setting.
Courses

Cytotechnology (CYTO)

CYTO 403 Gynecological Screening Laboratory (3 Credit Hours)
Laboratory experience in the screening of gynecological smears.
Prerequisites: Acceptance into the Cytotechnology Program and/or permission of the cytotechnology program director
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 404 General Pathology (3 Credit Hours)
This course is an overview of general disease processes and causes in the human. All body systems will be covered including respiratory, gastrointestinal, circulatory, nervous, reproductive, and urinary. Aging, dietary, and stress factors will be discussed in the disease process. Bacteria, fungi, and viruses will be discussed in general and for each body system. Neoplasms will be covered for each body site. This course will be of benefit to anyone interested in diseases of the human body or entering the medical field. (cross listed with MLS 401)
Prerequisites: junior standing
Pre- or corequisite: BIOL 250 and BIOL 251 or equivalent

CYTO 405 Normal Gynecological Cytology (3 Credit Hours)
Introduction to histological and cytological features of the normal female genital tract with emphasis on normal and non-neoplastic abnormalities. Principles of cytological diagnostic techniques will be discussed.
Prerequisites: Acceptance into the Cytotechnology Program or permission of program director
Pre- or corequisite: CYTO 403

CYTO 407 Clinical Histology (3 Credit Hours)
This course consists of the systematic study of cellular components as well as the grouping/organization of tissues into major 'organ' systems. Additionally, the cellular basis of examples of human diseases will be studied. Microscopic and virtual identification and morphology of cells, tissues, and organ substructures will be emphasized. This course will be of benefit to anyone interested in diseases of the human body or entering the medical field.
Prerequisites: permission of the instructor

CYTO 415 Abnormal Gynecological Cytology (4 Credit Hours)
Introduction to diagnostic cytological techniques and pathology of the female reproductive tract with emphasis on premalignant and malignant changes.
Pre- or corequisite: CYTO 403 and CYTO 405

CYTO 424 Respiratory Cytology (4 Credit Hours)
Principles of diagnostic cytology and pathology of the respiratory tract, including benign conditions, inflammatory and infectious diseases, premalignant conditions and primary and metastatic malignancies.
Prerequisites: Admission to the cytotechnology program
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 428W Cytopreparatory Techniques and Procedures (3 Credit Hours)
Introduction to collection, processing and preparation of cytoclogic specimens from all body sites and general laboratory procedures and regulations. A portion of this course consists of practical experience acquired in the laboratory. Practical experience will be performed during clinical site rotations throughout the Cytotechnology Program. Students will learn how to properly write lab reports and papers related to health science fields. This is a writing intensive course.
Prerequisites: Pre-admission to the Cytotechnology Program or Program Director permission: completion of ENGL 110C and ENGL 211C or ENGL 221C or ENGL 231C with a grade of C or higher

CYTO 430 Cytology Laboratory Operations & Ancillary Techniques (3 Credit Hours)
The course offers an introduction to laboratory regulations and ancillary diagnostic techniques. In addition, this course studies the cytology lab's role in conforming to regulatory and accrediting agency requirements. Students will learn ancillary techniques that are used in the cytopathology practice.
Prerequisites: CYTO 428W

CYTO 442 Gastro-Intestinal Cytology (2 Credit Hours)
Study of the pathology and cytology of the gastro-intestinal tract, including the oral cavity, esophagus, stomach, colon, and rectum. Emphasis on normal conditions, benign inflammatory, infections, parasitic conditions, gastric ulcers, premalignant and malignant lesions.
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 444 Genitourinary Cytology (2 Credit Hours)
Study of the pathology and cytology of the genitourinary tract, with emphasis in normal conditions, benign inflammatory and infectious conditions, crystals, premalignant and malignant lesions.
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 445 Breast Cytology (2 Credit Hours)
Study of pathology and cytology of the breast, with emphasis on benign, inflammatory conditions, premalignant and malignant disease in both breast smears and fine needle aspirations.
Prerequisites: CYTO 407
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 446 Body Fluids Cytology (3 Credit Hours)
Study of the pleural, peritoneal and pericardial cavity fluids, synovial and cerebral spinal fluids, with emphasis on benign, inflammatory conditions, and primary and metastatic malignancies.
Prerequisites: CYTO 407
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 448 Non-Epithelial Cytology (1 Credit Hour)
Study of the pathology and cytology of non-epithelial lesions with emphasis on benign, inflammatory, and malignant conditions.
Prerequisites: Admission to the cytotechnology program
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 456 Fine Needle Aspiration Cytology I (3 Credit Hours)
Study of specialized collection techniques, processing and diagnosis of fine needle aspirations from various body sites, including thyroid, liver, lymph nodes, pancreas, lung, mediastinum, salivary gland, and ovary. Clinical practical application of these principles will be continued at the clinical sites.
Prerequisites: CYTO 403, CYTO 405, CYTO 415, CYTO 424, CYTO 444, CYTO 445, and CYTO 446

CYTO 457 Fine Needle Aspiration Cytology II (3 Credit Hours)
Study of specialized collection techniques, processing and diagnosis of fine needle aspirations from various body sites, including kidney, retroperitoneum, breast, soft tissue, bone, eye, central nervous system, and skin. Clinical practical application of these principles will be continued at the clinical sites.
Prerequisites: CYTO 403, CYTO 405, CYTO 415, CYTO 424, CYTO 428W, CYTO 445, CYTO 446, CYTO 448, and CYTO 456

CYTO 458 Cytology Internship I (3 Credit Hours)
Directly supervised experience in a clinical setting: includes evaluation of gynecologic smears and study set assignments. Students will be exposed to cytopreparatory techniques.
Pre- or corequisite: CYTO 405 and CYTO 415

CYTO 468 Cytology Internship II (4 Credit Hours)
Directly supervised experience in a clinical setting. Includes evaluation of gynecologic and non-gynecologic specimen slides and study set assignments. Students will pre-screen gynecologic and non-gynecologic smears and study set assignments. Students will be exposed to cytopreparatory techniques.
Pre- or corequisite: CYTO 405, CYTO 415, CYTO 424, CYTO 444, CYTO 445, and CYTO 446

CYTO 478 Cytology Internship III (8 Credit Hours)
Directly supervised experience in a clinical setting. Includes evaluation of gynecologic and non-gynecologic smears and study set assignments. Students will be exposed to cytopreparatory techniques.
Prerequisites: Admission to the cytotechnology program
Pre- or corequisite: CYTO 405, CYTO 415, CYTO 424, CYTO 444, CYTO 445, CYTO 446, CYTO 456, and CYTO 457

### Health Sciences (HLSC)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HLSC 320</td>
<td>Health Equity and Disability Culture</td>
<td>(3)</td>
<td>This course will explore the history of health equity and disability and how prejudice and discrimination against people with disabilities impact health. Students will learn how to apply health equity frameworks, theories, and research to address disability-specific models of health disparities and to achieve health equity in populations with disabilities.</td>
</tr>
<tr>
<td>HLSC 335</td>
<td>Population Health</td>
<td>(3)</td>
<td>This course provides a population-based approach to professional work in disease management, chronic care management and politics, in addition to students studying public health, health policy, quality and patient safety, health care administration, medicine, nursing, pharmacy, social work and other related clinical professions.</td>
</tr>
<tr>
<td>HLSC 390</td>
<td>The U.S. Healthcare Delivery System</td>
<td>(3)</td>
<td>The uniqueness of the U.S. healthcare delivery system will be explored in terms of a systems framework and its complexity. The basic characteristics that differentiate the U.S. healthcare delivery system from that of other countries will be presented. An understanding of the U.S. health care system has specific implications for health services managers.</td>
</tr>
<tr>
<td>HLSC 395</td>
<td>Topics in Health</td>
<td>(1-3)</td>
<td>Study of selected topics.</td>
</tr>
<tr>
<td>HLSC 405</td>
<td>Interprofessional Study Abroad on Global Health</td>
<td>(1-3)</td>
<td>This study abroad service learning course will introduce the student to the political, social, cultural, and ethical issues involved in prevention and health promotion globally. Students will travel to another country and learn the incidence/prevalence, morbidity/mortality, and identified public health problems in specific regions and countries.</td>
</tr>
<tr>
<td>HLSC 425/525</td>
<td>Health Aspects of Aging</td>
<td>(3)</td>
<td>Identifies major issues and problems in meeting health care needs of the aged. Emphasis on role of social assets and supports in determining effects of life changes on the aging process.</td>
</tr>
<tr>
<td>HLSC 430W/530</td>
<td>Community Health Resources and Health Promotion</td>
<td>(3)</td>
<td>Designed to provide information about community health resources and health promotion theory. This is a writing intensive course.</td>
</tr>
<tr>
<td>HLSC 440/540</td>
<td>Finance and Budgeting in Healthcare</td>
<td>(3)</td>
<td>This course covers financial management functions in healthcare organizations including operating and capital budgeting processes along with budgeting and financial controls.</td>
</tr>
<tr>
<td>HLSC 450/550</td>
<td>Public and Community Health Administration</td>
<td>(3)</td>
<td>A review of the principles and practice of administering public and community health organizations and programs at federal, state, and local levels. Constituitional, statutory and administrative bases for organizing and conducting public/community health programs will be discussed.</td>
</tr>
<tr>
<td>HLSC 461/561</td>
<td>Managerial Epidemiology</td>
<td>(3)</td>
<td>This course will blend theory and application of epidemiology. This course will also provide a comprehensive introduction to epidemiology and explain how to use epidemiological concepts and tools to improve decisions about the management of health services.</td>
</tr>
<tr>
<td>HLSC 465/565</td>
<td>Policy and Politics of Health</td>
<td>(3)</td>
<td>This course will explore both health policy and the politics of health. Students will develop an understanding of the systematic and analytical framework for developing health and health care policy issues.</td>
</tr>
<tr>
<td>HLSC 468</td>
<td>Internship</td>
<td>(1-3)</td>
<td>The internship will allow a student new to the health administration field or public health field to complete a capstone internship to gain entry skills for a beginning career pathway in the profession. The course is intended to provide field experience and assimilation of the theoretical aspects learned in the coursework in a practical/work setting. A minimum of 200 hours is required for the 3-credit internship.</td>
</tr>
<tr>
<td>HLSC 475/575</td>
<td>Healthcare Marketing</td>
<td>(3)</td>
<td>This course provides a basic understanding of marketing in a health care setting. It will cover the following: the history of marketing in a health care setting, health care markets, marketing techniques, and leadership skills in managing and supporting the marketing efforts.</td>
</tr>
<tr>
<td>HLSC 480/580</td>
<td>Health Ethics and the Law</td>
<td>(3)</td>
<td>This course provides the students with a basic knowledge of health law and examines legal issues confronting health services administrators in various health care environments.</td>
</tr>
</tbody>
</table>

The College of Health Sciences provides a comprehensive range of courses designed to equip students with the knowledge and skills necessary for careers in various health-related fields. From understanding the health aspects of aging to exploring the complexities of public and community health administration, these courses are tailored to address the multifaceted challenges faced by health professionals today.
Recreational Therapy (RT)

RT 210  Leisure, Health, and Wellness (3 Credit Hours)
This course focuses on the concept of leisure and its impact on health and wellness for individuals and groups. Fundamental principles, philosophies, and theories of leisure, health, and wellness are emphasized. Leisure’s relationships with physical, cognitive, social, emotional, and spiritual growth, human satisfaction, and quality of life are explored. Leisure’s influence on challenges to wellness experienced by diverse populations (e.g., individuals with disabilities, older adults, racial and ethnic groups, individuals identifying as LGBTQIA+) is examined. Strategies for protecting and promoting health through leisure are integrated throughout the course.

Prerequisites: RT 261 or PRTS 261

RT 261  Foundations of Recreational Therapy Practice (3 Credit Hours)
This course is designed to be an introduction to the historical and conceptual roots of recreational therapy. Content includes recreational therapy service delivery models, legislation, professional organizations, places of practice, ethical conduct, and credentialing procedures.

Prerequisites: RT 261 or PRTS 261

RT 290  Professional Preparation in Recreational Therapy (3 Credit Hours)
This course is designed to facilitate personal exploration and professional preparation for careers in recreational therapy. Topics include professional ethics, professional involvement, professional behaviors & responsibilities, and career preparation. On-site observation of recreational therapists in practice settings is required.

Prerequisites: RT 261 or PRTS 261

RT 366  Internship Preparation (1 Credit Hour)
This course is designed to provide students with the skills and knowledge required to successfully acquire an internship placement in recreational therapy. Emphasis will be placed on resume and cover letters, internship search strategies, interviewing skills, and internship documentation requirements. Students are required to become familiar with all documentation requirements in the Recreational Therapy Internship Manual, and successfully secure an internship for the following semester.

Prerequisites: RT 261 or PRTS 261, senior standing, and a recreational therapy major or minor

RT 368  Junior Internship (3 Credit Hours)
This course requires a 200-hour junior internship experience at an approved health and human service agency in which students are involved with ongoing recreational therapy programs. Students are expected to observe and assist recreational therapy staff during this field experience. Students must be supervised by a Certified Therapeutic Recreation Specialist (CTRS) working for the agency.

Prerequisites: Junior standing, RT 261/PRTS 261, RT 290/PRTS 290, RT 420/PRTS 420, RT 450/PRTS 450, and a declared Recreational Therapy major

RT 420  Intervention Techniques in Recreational Therapy (4 Credit Hours)
This course is designed to introduce students to a wide variety of Recreational Therapy interventions. Students will explore physical, cognitive, and psychosocial interventions. Facilitation techniques, activity modification, and group facilitation will be explored. Students will connect diagnostic groups to specific Recreational Therapy interventions. Students will facilitate group recreational therapy interventions during lab.

Prerequisites: RT 261 or PRTS 261, recreational therapy major or minor, and junior or senior standing

RT 430  Assessment, Documentation, and Evaluation in Recreational Therapy (3 Credit Hours)
This course will provide students with a detailed examination of assessment, documentation, and evaluation procedures used in the recreation therapy treatment process. Course focus includes the assessment and documentation process, including instrument design, selection, and implementation, and the reporting and use of data for treatment planning and program evaluation.

Prerequisites: RT 261 or PRTS 261, recreational therapy major or minor, and junior or senior standing

RT 450  Diagnostic Groups in Recreational Therapy (3 Credit Hours)
This course is designed to introduce students to a variety of disabilities, illnesses, and health conditions recreational therapists may encounter in practice. The prevalence, etiology, diagnostic criteria, pathology, symptomatology, and prognosis of various conditions is presented, and the bio-psycho-social impact of the illness/disability on the individual and family is discussed. Emphasis is placed on the delivery of recreational therapy services for individuals with illnesses/disabilities and related populations.

Prerequisites: RT 261 or PRTS 261, recreational therapy major or minor, and junior or senior standing

RT 460  Administration of Recreational Therapy Services (3 Credit Hours)
This course explores the basic principles of organizing and managing quality recreational therapy services. Content includes supervisory and administrative responsibilities, budgeting, managing personnel including student interns and volunteers, developing a clinical supervision program, marketing recreational therapy services, and developing a recreational therapy department based on professional standards of practice and recreational therapy models of service delivery.

Prerequisites: RT 261 or PRTS 261, recreational therapy major or minor, and junior or senior standing

RT 468  Senior Internship (12 Credit Hours)
This capstone course requires a 560-hour and 14-week senior internship experience at an approved health and human service agency practicing recreational therapy. Students will apply academic learning and will demonstrate competencies associated with entry-level practice in recreational therapy. The student’s academic and agency direct supervisors must be Certified Therapeutic Recreation Specialists.

Prerequisites: Senior standing and permission of instructor

RT 470  Recreational Therapy Program Design and Implementation (3 Credit Hours)
This skill-based course is designed to further students’ practical understanding of client-centered recreational therapy program design and implementation using evidence-based strategies, techniques, and interventions. Emphasis is placed on the purpose, roles, and outcomes of recreational therapy service delivery in healthcare and community settings. Topics include assessment, recreational therapy practice models, specific program planning, task analysis, facilitation techniques, implementation of evidence-based interventions, documentation, and evaluation of services as well as interprofessional practice. Field-based application of course concepts is required.

Prerequisites: RT 261 or PRTS 261, recreational therapy major or minor, and junior or senior standing

Pre- or corequisite: RT 420/PRTS 420 and RT 450/PRTS 450

RT 480W  Evidence-Based Practice and Trends in Recreational Therapy (3 Credit Hours)
This course provides an overview of evidence-based practice and related disciplinary writing in recreational therapy contexts. Through exploration of current trends and issues in the field of therapeutic recreation and a writing intensive approach, students develop skills in evaluating and interpreting research and applying applicable findings through evidence-based practice, service to the field, and professional advocacy. This is a writing intensive course.

Prerequisites: ENGL211C/ENGL 221C/ENGL 231C, RT 261 or PRTS 261, declared recreational therapy major, and junior or senior standing
RT 497  Independent Study (1-3 Credit Hours)
Individualized instruction to include research, specialized studies, or other
scholarly writing.
Prerequisites: Declared recreational therapy major and permission of
instructor
